

Preetanshu Mishra

Senior Mobile Application Developer with 11+ years of experience building Android, iOS, and cross-platform apps in Kotlin, Swift, .NET MAUI, and Xamarin. Specializes in MVVM, Clean Architecture, test automation, offline-first architecture, and delivering measurable product outcomes.

EXPERIENCE

Freelance Mobile Application Developer, Greater Toronto Area

November 2025 - Present

Multiple Apps (iOS, Android): Delivering iOS and Android mobile features for multiple client apps using Swift, Kotlin, and cross-platform tooling.

STACK Constructions Canada, Montreal — Mobile Software Engineer

December 2023 - November 2025

Stack Build & Operate App (iOS, Android): Built a custom 2D drawing canvas in Swift and Kotlin for construction takeoff measurements, supporting multi-touch gestures, layered drawings, real-time area calculations, and vector-based infinite zoom, which helped reduce plan review time by 50%.

- Developed and shipped iOS and Android features end-to-end in SwiftUI and Jetpack Compose, improving feature delivery across the offline-first construction app.
- Wrote unit and integration tests for core iOS and Android modules, increasing regression protection and supporting stable releases across the construction app.
- Implemented and maintained offline-first data sync with conflict resolution strategies

Sidekick Interactive, Montreal — Senior Mobile Developer

November 2023 - February 2024

Multiple Apps (.NET MAUI): Modernized enterprise application portfolio by migrating legacy Xamarin.Forms apps to .NET MAUI framework - improving performance, user experience, and long-term maintainability. Reduced technical debt through systematic refactoring and implemented automated testing suite, resolving critical production bugs and improving code reliability.

- Developed and maintained cross-platform enterprise features in .NET MAUI, helping modernize the app portfolio after migration from Xamarin.Forms.

SKILLS

Android: Kotlin, Jetpack Compose, Coroutines, Flow, RxJava, Hilt, Dagger, Koin, Room, DataStore, Retrofit, OkHttp, Navigation, Canvas API, BLE
iOS: Swift, Swift Concurrency, SwiftUI, UIKit, Combine, URLSession, Core Graphics, MapKit, Core Bluetooth, EventKit
Cross-Platform: .NET MAUI, Xamarin.Forms, Xamarin.iOS, Xamarin.Android, Prism, MvvmCross, ReactiveUI
Testing & Architecture: MVVM, Clean Architecture, SOLID, Accessibility, JUnit, NUnit, xUnit, Espresso, XCTest, XCUITest, Appium

EDUCATION

Post Baccalaureate Diploma in Business Analytics

Cape Breton University

Nova Scotia, Canada

January 2023 - December 2024

Post Graduate Diploma in Wireless and Mobile Computing CDAC-ACTS

Bangalore, India

August 2013 - February 2014

Bachelor of Technology in Electrical Engineering

Uttar Pradesh Technical University

Lucknow, India

July 2007 - June 2012

- Wrote unit tests and improved test coverage using NUnit and xUnit
- Migrated legacy Xamarin.Forms components to .NET MAUI, reducing technical debt and improving long-term maintainability of the enterprise mobile codebase.

LinkedIn, Bengaluru — Senior Software Engineer

June 2021 - May 2023

Workplace Management App (iOS, Android): Built interactive floor plan visualization with real-time occupancy status and QR code check-in system for LinkedIn's internal Workplace Management App - improving office resource utilization and employee productivity using Swift/Kotlin. Architected real-time system with WebSocket integration and native calendar synchronization (EventKit/CalendarContract) - serving thousands of LinkedIn employees for room bookings, desk reservations, food ordering, and meeting coordination across iOS and Android.

- Developed and shipped iOS and Android workplace management features including floor plans, occupancy tracking, and room booking workflows for thousands of employees.
- Implemented accessibility features across the Android and iOS app aligned with Microsoft guidelines, improving usability for assistive technology users.
- Contributed to technical design reviews and architecture decision records

Hexaware Technologies Ltd., Chennai — System Analyst

October 2018 - May 2021

Human Resource Management System App (iOS, Android): Built an enterprise HR management app with timesheets, leave approvals, biometric authentication, encrypted payslips, and offline caching, serving 1000+ employees with SSL pinning and encrypted data storage.

Vehicle Insurance System App (iOS, Android): Built a vehicle insurance app with policy dashboards, claims submission, renewal workflows, payment integration, and real-time claim tracking while supporting PCI DSS-compliant transactions.

Life Time Member App (iOS, Android): Built class booking system for Life Time Member App (filtering by type, instructor, difficulty), spa/salon appointment scheduling with therapist selection, workout video streaming with offline download capability during COVID-19 lockdown, TV casting integration (AirPlay/ChromeCast) with real-time Heart Rate Monitor using BLE, and restaurant ordering with real-time order tracking.

- Developed native iOS and Android features across multiple concurrent enterprise applications
- Integrated third-party SDKs including payment gateways, BLE frameworks, and media libraries
- Mentored junior developers and led technical knowledge-sharing sessions within the team

Xebia India, Bengaluru — Consultant

January 2017 - September 2018

Training and Education App (Xamarin.Forms, PrismMvvm): Built a Xamarin.Forms training platform for Xebia Academy covering course catalogs, enrollment, schedules, learning materials, and progress tracking, enabling digital delivery of professional training programs.

Life Time Member App (iOS, Android): Built class booking system for Life Time Member App (filtering by type, instructor, difficulty), spa/salon appointment scheduling with therapist selection, workout video streaming with offline download capability during COVID-19 lockdown, TV casting integration (AirPlay/ChromeCast) with real-time Heart Rate Monitor using BLE, and restaurant ordering with real-time order tracking.

IT Services App (Xamarin.iOS, MVVM): Sole developer for an app managing client engagements across multiple companies.

Aviation Management Apps (Xamarin.Forms, PrismMvvm): Built three Xamarin.Forms aviation apps for SpiceJet covering crew access, in-flight compliance auditing, and fuel management, supporting operational digitization and regulatory reporting.

EPAM India, Hyderabad — Software Engineer

February 2014 - January 2017

Automated Vehicle Sales Management App (Xamarin.iOS, Xamarin.Android, MvvmCross): Built automated vehicle sales management app for Lookers UK dealership network with inventory management, customer relationship tracking, test drive scheduling, finance calculation tools, and digital paperwork processing - streamlining end-to-end sales workflow from initial inquiry to final delivery. Integrated real-time vehicle availability sync across multiple dealership locations, automated pricing engine with trade-in valuation, and digital signature capture for contract execution.

Other Xamarin projects: Mobile Analytics Dashboard, IT Services Support tools, Warehouse Inventory Management, an Internal Enterprise App Store, and a Salesforce Automation app.
